

Group:

- Soel Mullenkuzhiyil Sunny
- Raphael Genova
- Athalia Rochelle Handowo

Soel's Solution

- The dropdowns are within reach.
- We get to see all timeframe of the table/graph at once
- The different color of the left and right area creates distinction.
- Chart changing is very helpful as to see further details of the CTA ridership data.
- Having multiple graphs makes it easier on the eyes to see all data.
- The color scheme is very simple to understand.
- All graphs and widgets are uniform in size.
- We can select the number of entries on the table.
- Labels on the x and y axis.
- Easy to distinguish between what dropdowns are used for which graphs.
- The menu drop down works independently, thus it doesn't affect other graphs.
- Size of the fonts are easy to read and the importance based on the size distincts it.

Raphael's Solution

- Colorful, distinct each bar by color so we can see the number according to the X axis value.
- Simple and easy to user interface, the dropdown names are clear and easy to navigate through.
- The dropdown on the side makes a clean sections (distincts on the graph and menu)
- The barchart are all of the same size and have equal space between individual bars.
- Legend on each chart explained the bar chart colors.
- Labels on the x and y axis
- The years on x axis are of sufficient space in bar chart.
- The sidebar and the main part colors are pleasing to the eyes.
- The tab on the bottom is unique and not distracting from the statistics.
- The labels of the dropdown boxes clearly distinguish and the words used to describe them are accurate.
- The menu drop down works independently, thus it doesn't affects other graph
- The size of the fonts of titles are easy to read.
- font size displays the level of importance.
- The about page details are also clearly laid out.

Athalia's Solution

- Uniform design for analyzing two stops is pleasing to the eyes
- Having the side by side look with the data table and graph is helpful for understanding details
- The tab by tab view clearly tells which chart we are looking at.
- The Barchart has the necessary height to give us the correct visual information of the data.
- Split screen design of page layout (half light / half dark)
- Labeling of tabs is nice (emphasizing what tab you are on)
- The height of tables is constant and won't change even if the number of entries are less than appropriate ones.
- Her days in table and graphs are sorted in the correct order and are thus easy to track.
- Her months are also sorted in th correct order from Jan to Dec and are thus easy to track.
